DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 45, 46, 48-69, drawn to a method of treating radiomucositis and a composition for said treatment.

Group II, claim(s) 47, drawn to a method of protecting mucous membranes.

Group III, claim(s) 70-77, drawn to a method of treating chemomucositis and a composition for said treatment.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group II includes protecting against diseases such as xerostomia, which is not included in Group I. Group II differs from Groups I and II in that chemotherapeutic agents are used instead of radiotherapy.

A telephone call was made to William E. Player on 07/08/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

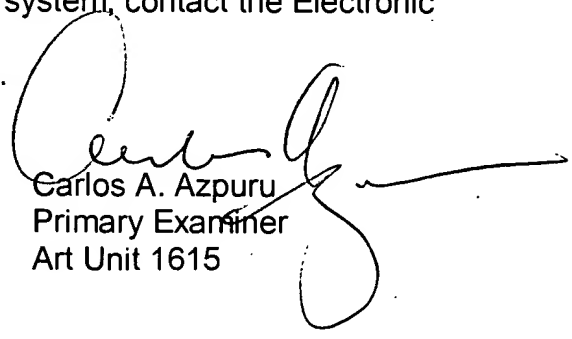

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
